

Loading Of Dataset

The screenshot displays the IBM Cognos Analytics interface. On the left, the 'Data module' pane shows a search bar and a tree view containing 'AirStats-DataPrep' and its sub-items: 'Navigation paths', 'regions.csv', 'countries.csv', and 'airports.csv'. The 'airports.csv' file is selected and highlighted. The main workspace shows the 'Grid' view of the dataset, which is a table with 9 rows and 7 columns. The columns are 'Row Id', 'Id', 'Ident', 'type', 'name', and 'latitu' (partially visible). The rows contain data for various airports, including 'Total RI Heliport', 'Aero B Ranch Airport', 'Lowell Field', 'Epps Airpark', 'Newport Hospital & Clinic Heliport', 'Fulton Airport', 'Cordes Airport', 'Goldstone (GTS) Airport', and 'Williams Ag Airport'. A 'Show desktop' button is visible in the bottom right corner of the table area.
